Brave Expands Trencher Line-Up

New trencher is powered by a Honda engine and features a 7-inch trenching depth

Rogers, Minn. – August 2017: Brave's new BRPT704H is a lightweight, belt and pulley driven trencher that operates at a rate of up to 20 feet per minute. It offers an easy to use, versatile design and can be easily loaded, unloaded and operated by one person.

The BRPT704H rotor is fully enclosed with a clutch lever to cut power to it for safety. Adjustable trench depth from 4" to 7" with standard rotor. Changing the tungsten carbide rotor is easy with the removal of a single nut using a tool that comes standard with each unit. The trencher's low-profile design provides maximum stability with minimum turf damage.

With optional specialized rotors, this trencher can be used for a variety of landscaping tasks including burying cable or pipe, pruning roots, grinding small stumps, defining landscape beds, and installing edging, invisible dog fencing or sprinkler systems.

About Brave

Brave manufactures high-quality, outdoor power equipment for direct distribution and distribution through a network of dealers, rental stores, big-box stores, national accounts and hardware co-ops nationwide. Top quality Brave log splitters have been available since 1982. Brave has since expanded its line-up to also include hot and cold water pressure washers, earth augers, generators, hydraulic power packs, trenchers and pumps.
