Brave Introduces Dewatering Pumps

Line-up includes both semi-trash and trash pumps

Rogers, Minn. – January 2017: Brave has added a line of trash pumps to their current line-up of log splitters, pressure washers, trenchers and earth augers.

The trash pump line-up includes two semi-trash models and one trash model. All are powered by Honda engines. They feature aluminum housing and a cast iron impeller and diffuser for long life. Pumps are able to handle solid particles in suspension up to 1-1/8" in diameter, offer a 50 PSI maximum and provide 147-272 GPM maximum dependent on model. All models come with a basket strainer, hose adapters, EPDM mechanical seal and inlet valve. Available in 2" or 3" port sizes to fit common hoses. Perfect for flood water removal, lawn and garden watering and pond filling.

About Brave

Brave manufactures high-quality, American-made outdoor power equipment for direct distribution and distribution through a network of hardware and farm supply stores nationwide. Top quality Brave log splitters have been available in the USA since 1982. Brave product quality and commitment to customer service is of the highest level, resulting in some of the highest customer satisfaction ratings in the industry. So whether you're a homeowner, farmer, rancher or commercial user, you can be assured that Brave product quality and customer service will exceed your expectations. The Brave line-up includes horizontal, horizontal/vertical and tractor mount log splitters, hot and cold pressure washers, earth augers, a trencher and trash pumps.
